## A Kayak that Packs in More Fun

No matter how big your boat is, there's never enough room for all your toys. So the **Airis inflatable kayak** from Walker Bay could solve one of your space problems. It's constructed of a seven-layer, reinforced, polymer-coated fabric that allows the boat to be inflated to a hard 6.5 psi. When inflated, the two air chambers give a rigid hull that requires no additional stiffeners. When deflated, the kayak stows in an easy-to-carry backpack. Models range from 8 to 11 feet long and weigh 15 to 21 pounds. \$850 (for the 8-footer); (604) 683-1877, [www.walkerbay.com](http://www.walkerbay.com)
