AIRDOCK

Unlike a traditional wood dock, this compact, inflatable dock requires no maintenance, and comes with its own carry case and pump. The eight-foot long and eight-inch thick dock weighs 48.5 pounds [22 kilograms] and is sturdy enough to hold several adults, kids and pets. It is made from a seven-layer polymer-coated fabric with thousands of drop-stitch fibres, like an elaborate web, and has four Aqua-Loc ballast bags to prevent it from slipping on the water surface. Its 16 stainless steel D-rings keep it anchored to the dock or boat where it is stationed. It has a six-month warranty and costs \$1,999. Accessories, such as covers, coolers and pillows, can also be purchased.
