All dimensions & weight measurements indicated have a tolerance of plus or minus 3% and 5% respectively and are subject to change without notice.

The feature loaded Genesis Console RIB combines the award winning Genesis HMC Hull with a fully integrated injection molded Center Console unit. Together they create a sporty lightweight boat, boasting ample storage space, superior comfort and exceptional performance over any other small RIB.

Setting themselves apart from off-the-shelf center console units with thoughtful design and complete integration, Walker Bay has designed the innovative Quick-Clip™ system that locks the console into place without any drilling. The top part of the console tilts for easy access during maintenance and provides quick entry to the battery and rear side of the dashboard. The dashboard has room for up to 3 dials and comes with a deluxe stainless steel steering wheel with rubber grip. The console accommodates either flush mount or side mount motor controls and the electrical kit comes with navigation lights, a stern light and a switch panel. Available in Orca Hypalon or PVC in 340 & 310 sizes.
